BULBS
TREES, SHRUBS
AND PLANTS
FOR FALL PLANTING

HOLM & OLSON, INC.
ST. PAUL MINN.

Things You Should Remember

Best Time to Order. As promptly after receiving the price-list as possible.

When We Ship. Fall bulbs are ready for shipment September 1 to 15. Trees, shrubs, etc., October 1. Pconies and Iris, September 1 to 15.

H. & O. Prices. Our prices are based on "H. & O. Quality," the best money can buy or produce, hence do not be deceived through cheap seed catalogs offering quantity rather than quality.

Cash with Order. Orders should be accompanied by cash. It requires time and expense at a busy season to look up credits.

How to Ship. Bulbs can go by express or parcel post. If by parcel post, postage should always be added to order. Trees and shrubs should be sent by express and freight.

Bulb Orders. Orders for bulbs accompanied by cash amounting to \$5, or over, will be delivered free

You Should be Careful. No matter how often you write us, always sign your name in full; give post office and state; write your order carefully and plainly, and do not mix with your letter.

The Park Nurseries

Every patron living out of the city should arrange, when visiting St. Paul or Minncapolis, to visit the Nurseries. It will be an education. You can learn more of the "H. & O. Quality" in one hour than it is possible for us to convey to you in books. Throughout the city you can see the living pictures that we have used to illustrate our work.

To Reach the Nurseries: From any down-town point take the St. Clair-Hope Street Car. This line takes you within two blocks of the Nurseries. Coming from Minneapolis, take Selby-Lake Car, change at Snelling cross-town line to Grand Avenue Car; get off at Lexington and walk south to St. Clair. If motoring, take Summit Avenue to Lexington Boulevard, and south to St. Clair. Our Superintendent is always on hand, willing to explain everything to you.

Beautifying Your Grounds

Our Landscape Men cover the entire Northwest. We do not solicit orders, and have no agents; we offer our patrons **Service**. We will design your grounds, advise you how they should be treated, and furnish you a plan that you can work out. It is not necessary to do it all at one time, but when finished you have something of beauty, and that will harmonize with your home. When necessary, we furnish men to superintend the planting so that everything is placed properly, and is planted properly. Hence you see the service is complete. We design, plan, furnish the material, and superintend the planting. No other firm in the West can furnish you this service.

Collections for Tulip-Beds

The arrangement of the following beds will give very striking results. The beds are 6 feet in diameter and require 156 bulbs, planted 5 inches apart each way. These combinations can be changed, if desired.

Bed A	Bed B	Bed C
1. 39 Artus	1. 54 Chrysolora	1. 80 Chrysolora
2. 39 La Reine	2. 48 Artus	2. 76 Artus
3. 39 Chrysolora	3. 54 La Reine	
4. 39 Cottage Maid		

These collections must be sent by express or freight, charges not prepaid.

SCALE 0 1 2 4 6 FEET

Baron Van Thuyll Grande Blanche La Grandesse Lady Derby

Transferred from the Library
of Congress under Sec. 59,
Copyright Act of March 4, 1909

Quality Hyacinths

Culture Outdoors. Plant the bulbs 6 inches deep, very uniformly, that they may come into bloom at the same time. A good method is to remove about 4 inches of the soil, level the bed carefully and plant the bulbs 6 inches apart each way, pressing the earth firmly and evenly over the bulbs.

Culture in Glasses. Special glasses are manufactured for the culture of Hyacinths, the bulb fitting in the top. These glasses should be filled with fresh water, also some gravel, and if at hand, some charcoal.

Culture in Pots. Hyacinths are grown successfully by planting in pots. Use good, rich soil, with plenty of manure. Place some pieces of broken pots in the bottom for drainage, and use 4- or 5-inch pots. Firm the bulb well in the soil, allowing the top of it to stand just a little above the soil. If flowers are wanted for Christmas, the bulbs should be planted in September.

Pink Beauty

Imperator rubrorum

Keizerkroon

Selected Early Tulips

The length of the flower-stem is indicated by figures; the time of blooming by letters (E, early; L, late), so that you can select varieties of the same height and time of blooming.

Culture Outdoors. Any good garden soil, prepared by spading to a depth of 12 inches, is suitable. Plant the bulbs 5 inches apart and about 4 inches deep. The soil must be equally placed over the bulbs, so they will come up at the same time. Firm the earth well about the bulbs and mulch the beds during the winter.

Culture in Pots. Place six to eight bulbs in a 6-inch pot; set in the dark for a time. If you have a number of pots, take them from the dark room at intervals, so they bloom at different times.

Darwin Tulips, Madame Krelage

DARWIN TULIPS

A distinct type of Single Late Tulips, with immense, bowl-shaped flowers of well-rounded form, growing on tall, thick stems from 2 to 3 feet in height. The very brilliant colors, ranging from almost pure white through all the shades of pink and purple to a most intense red, together with the long stems, make them unsurpassed for cutting.

This type is admirably suited for planting in borders of shrubs and perennials. The blooms give life and color to any garden. The varieties offered are the best of the type, selected from a large list, and give all the different colorings.

DOUBLE TULIPS

The Double Tulips are used for both bedding and forcing. Their large, peony-like blossoms are highly ornamental, coming into bloom a little later than the single sorts, and lasting considerably longer in flower. They make their best display when planted in groups and beds, but are not so highly colored as the single sorts.

Queen of the White Crocus

SELECTED CROCUS

Can be planted in the grass or as a border for beds of perennials or around the edge of beds of other bulbs. When planted in sheltered locations they flower in March. They can be planted anywhere in the lawn, and after blooming the tops can be cut with a lawn-mower without injuring the bulbs.

Our selection is the best; the extra-large, well-selected bulbs will produce large flowers of all shades of white, yellow, and blue.

Bulb Fiber. The growing of bulbs indoors gives one much pleasure during the winter months, and best of all, gives you blossoms that will remain for a long season, or that can be cut for any purpose. When growing bulbs in this manner it is wise to give them the best condition that can be made for their growth so that they will produce the best possible flowers. **Bulb Fiber** is the material that does the work; it is clean, odorless, holds moisture, and contains plant-food such as the bulbs need. Qt. 10 cts. 4 qts. 35 cts., pk. 65 cts., bus. \$1.50.

ANEMONES, Poppy-Flowered

If planted in the fall in wet or moist places they will bloom in early spring.

Cernua lutea (Buttercup). Yellow. 30 cts. per doz., \$2.50 per 100.

Double Von Sion

Emperor and Empress

Poeticus (Pheasant's Eye)

SELECTED NARCISSI (The Spring Daffodil)

The Narcissi are among spring's earliest flowers, and there is no reason why we should not partake of the pleasures they bring with the first warm days of spring. The Narcissi grow in almost any location, doing well in sunny or shady places, and it matters not if wet or dry. They continue to bloom year after year, increasing in size and effectiveness. They are valuable to place in the border of perennials or shrubbery, where they can be left undisturbed, and for naturalizing in the grass. For forcing, treat the same as tulips, planting them in pots. The flowers assume many forms, and present charming combinations of white, gold, orange, sulphur, and pure yellow.

Add 10 cts. per dozen for postage	

CHINESE SACRED LILY

The bulbs grow nicely in pots of soil, but the quickest way to get them into bloom is to set them in a bowl of water with a few pebbles to hold them in place. Each bulb sends up from five to ten flower-stems, producing great clusters of large, pure white, wax-like blossoms with yellow centers and delicious fragrance. Some blooms are single, others double, but all equally beautiful. Our bulbs come direct to us from China.

	Each	Doz.	100
Extra-size bulbs.....	\$0 15	\$1 50	\$12 00
First-size bulbs.....	12	1 00	8 00
Add 20 cts. per dozen for postage, if wanted by mail

An artistic planting of Maples, Evergreens, Shrubs and Vines

Ornamental Trees

For Fall Planting. We do not advise the planting of all varieties of trees in fall, but those that can be planted will make and give you a better and larger tree the coming year.

The season for shipping begins October 1, and usually ends November 15. Our trees are dug fresh from the nursery row, and shipped without being stored.

Transplanted Trees. The question is often asked, "What do you mean by transplanted trees." Just this: We are not what is termed a "commercial nursery;" we grow nursery stock from a landscape standpoint, making a specialty of ornamental stock for beautifying city and country homes. The trees and shrubs you have been in the habit of buying *we* transplant into nursery rows, setting them twice and three times the usual distance apart, cutting them back to make them put on a bushy head and heavier stem, and, most important, a better root-system. Such nursery stock, when planted in your ground, withstands the shock of transplanting much better than the ordinary, and responds much more quickly, giving you results that are more satisfactory.

What are Specimen Trees? This question is often asked. Specimen trees are selected specimens that have been transplanted from time to time, and have grown into a large size, and can be moved safely, giving quick results. Ordinarily, the large trees in a nursery are "culls" left over, or unsold, but the fact that they have never been transplanted makes them of little or no value.

Ash, American White (<i>Fraxinus Americana</i>).	Each	10	100

Weeping Trees

Most weeping trees are best transplanted in spring. See list in "Creating Your Landscape."

Evergreens

This class of trees should not be transplanted in the Northwest in the fall. See "Creating Your Landscape," for list of varieties.

LECTURES

We are frequently requested to give talks before clubs, societies, etc., on different phases of Landscape Gardening. We have Landscape Architects who are schooled in this work, having lantern-slides covering the arrangement of grounds, illustrating beautiful effects, showing the before and after results. Write us as far in advance as possible for date, telling us character of meetings and about what you desire. We have hundreds of slides to choose from.

HOLM & OLSON, Inc., Landscape Architects

Shrubs of medium height in the foreground, with taller growers against the house, harmonize with this type of building

Deciduous Shrubs

FOR FALL PLANTING

The following list of Shrubs can be planted in this latitude in the fall very satisfactorily; in fact, you will have better results the following summer from fall planting.

Nursery-Row Shrubs. We are asked how they differ from other shrubs. Nursery-row shrubs are those that are planted 6 to 8 inches apart in the row when they come from the seedling or cutting bed. They have one, two and three stems,—just what you get from other nurseries.

Transplanted Shrubs. These are the nursery-row plants dug and transplanted into rows, set 1½ to 2 feet apart, and cut back so they may make a bushy top and a good root-system. It takes two years to accomplish this, but we get a plant of more than double value. They transplant with much less loss, and give a great deal better satisfaction. Ask any of our patrons.

Specimen Shrubs. Are large, fully developed plants that give results from the time they are planted. They are moved from time to time, and can be taken up with a ball of earth the same as evergreens. We can supply these in all sizes of most varieties. They range in price from \$1.50 to \$7.50 each.

Amelanchier alnifolia (Juneberry)	Each	10
18 to 24 in., nursery row.....	\$0 25	\$2 00
2 to 3 ft., nursery row.....	35	3 00
2 to 3 ft., transplanted.....	50	4 00

3 to 4 ft., transplanted.....	3 50	30 00
Siberian Pea (<i>Caragana arborescens</i>).		
Prices same as Russian Olive.		

The charm of the old-fashioned garden can be created only by the use of hardy perennials

Hardy Perennials

Usually fall is a good season for setting out these plants, but they should be mulched and planted early rather than late in the season.

Peonies and Irises are best planted in September. They will bloom the following spring.

The prices for Perennials vary somewhat, but all varieties not marked with a star are as follows:

1-yr., 15 cts. each, \$1.50 per doz.; 2-yrs., strong, 25 cts. each, \$2.50 per doz.

Varieties marked with star, 1-yr., 25 cts. each, \$2.50 per doz.; 2-yrs., 50 cts. each, \$5 per doz.

NOTE.—While we grow the very finest Perennials, and agree to deliver them in good condition, they are sold with the understanding that should any fail to grow it is the purchaser's loss. Owing to the low prices at which they are sold, we cannot guarantee them to grow, and all orders are accepted on these conditions.

Achillea, Boule de Neige (Ball of Snow).

Achillea, Ptarmica, The Pearl.

Aconitum Starkianum (Monkshood).

Agrostemma (Rose Campion).

Ægopodium podagraria variegatum (Bishop's Weed).

Velvet-Sod Lawn Seed

One of the most essential parts of the country place and suburban home is a properly made and well-kept lawn. We have made careful study of the grasses required for best results, and the formulas of our various grass mixtures are based upon these experiments.

The days of laboriously making lawns from sod are rapidly passing away. Good lawns are now made from *good grass seed*—the essentials are a careful blending of varieties adapted to producing a thick turf with velvety appearance. Each variety in this composition has a special purpose; some make strong, fibrous roots, that take hold on the earth and hold it in position; others, of a creeping nature, quickly fill up the vacant spots; yet other sorts are used for their color value, besides kinds that are able to withstand heavy or excessive rains. Our Velvet-Sod Mixture is composed of the best, strictly pure seeds of hardy lawn grasses from America and Europe. It quickly produces a permanent lawn of rich green and luxuriant growth. If you need grass seed for only a small city yard, or a large lawn of acres, use this mixture.

QUANTITY OF SEED TO SOW.—One pound of our lawn grass seed will sow 10 x 20 feet, or 200 square feet. This is heavier than recommended by many seedsmen, but practical experience in making lawns in our landscape department has taught us to use sufficient seed, and the best that can be obtained

NOTE. Write for booklet "The Essential Principles of Lawn Making."

VELVET-SOD MIXTURE

Our Velvet-Sod Mixture will make a close, thick turf in a very few weeks, which maintains its beautiful, rich green the entire season. We know our mixture to be among the best on the market, and we ask our patrons to carefully consider this before placing their order. The weight of this mixture shows its extra-high quality, and it is entirely free from chaff. Our experience as landscape gardeners has taught us the best Lawn Grass Mixture for parks, cemeteries and private grounds. Lb. 30 cts., 5 lbs. \$1.50, 10 lbs. \$2.75, bus. (20 lbs.) \$5.

CAPITAL CITY MIXTURE

This mixture is admirably adapted to all uses, but the quality of the seed is not so high as our Velvet-Sod Mixture; but, for ordinary sowing, will answer the same purpose. Lb. 25 cts., 5 lbs. \$1.25, 10 lbs. \$2.25, bus. (20 lbs.) \$4.

SHADY-SIDE MIXTURE

This will produce quickly an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted to growing in the shade. Lb. 35 cts., 5 lbs. \$1.75, 10 lbs. \$3.25, bus. (20 lbs.) \$6.

GOLF-LINK MIXTURE

This mixture is composed of grasses best suited for golf-links, and is the result of careful experi-

ments, as well as careful watching for several years of practical results on golf-links sown with our seed. Lb. 30c., 5 lbs. \$1.50, 10 lbs. \$2.75, bus. (20 lbs.) \$5.

PUTTING-GREEN MIXTURE

The hardiest and finest low-growing grasses are contained in this mixture. It produces a beautiful and lasting green turf calculated to withstand hard tear and wear. Lb. 50 cts., 5 lbs. \$2, bus. (20 lbs.) \$6.

TERRACE MIXTURE

A special mixture of grasses for sowing on terraces and hillsides, producing spreading roots, thus preventing heavy rains from washing out. Lb. 30 cts., 5 lbs. \$1.50, 10 lbs. \$2.75, bus. (20 lbs.) \$5.

WHITE CLOVER

The best variety for lawns, as it forms a close herbage and remains green throughout the season. Sow in spring at the rate of six pounds to the acre when sown alone; half the quantity when sown with other grasses. ½ lb. 35 cts., lb. 60 cts., 5 lbs. \$3.

KENTUCKY BLUE GRASS

Especially suited to meadows and rich lands. It is the grass of the famous limestone soils of Kentucky, and is no less a favorite all through the northern states. A perfect lawn grass. Lb. 25 cts., 5 lbs. \$1.25, 10 lbs. \$2.25, bus. (20 lbs.) \$4.

OUR CUT-FLOWER DEPARTMENT

Flowers, the most beautiful gift of Nature, are appropriate for any and all occasions of a social nature, as well as for funerals, birthdays, gifts for the sick, and many other occasions. The proper arrangement of flowers is a study in itself, quite distinct from the growing of them. We have a large force of clerks who, by long experience in handling flowers and studying color combinations, are enabled properly to select and arrange flowers for any and all occasions.

We handle every variety of cut-flowers in their season that are known to the trade, and daily ship to all parts of the Northwest. Our shipping Department is well equipped, and we pack and ship flowers so that they will carry safely to any point when the time in transit does not exceed 36 hours.

BRIDAL FLOWERS

Bouquets for Brides and Attendants are made up in a variety of ways, and of a great assortment of flowers. We issue a special catalog of these bouquets, which we will be pleased to mail on request.

PARTY AND RECEPTION FLOWERS

Our large corps of experienced clerks study the wants of our patrons, and the latest styles in flowers and bouquets, and are prepared at all times to supply the most up-to-date creations in party bouquets.

FUNERAL FLOWERS

We make a specialty of these, and employ expert help, who devote their entire time to the creating of new designs and arranging new effects in flowers for funeral occasions. We make any kind of Lodge Emblems or Designs on short notice.

BOXES OF ASSORTED FLOWERS

For any and all occasions. These are made up of choice assorted flowers, put up in a neat attractive box as shown in picture, each box containing special values, at prices ranging from \$2 to \$10 each.

FLOWERS DELIVERED ANYWHERE—ANY TIME

Through the Florists' Telegraph Association (a mutual arrangement with the leading florists of the country), we can deliver flowers in all cities of the country, and in any town where there is an express office, on short notice. This is at no additional expense to our customers, except the cost of telegram.

PRICE-LISTS

We issue monthly price-lists of cut-flowers throughout the year, also a special price-list of cut-flowers and blooming plants for Christmas and Easter, a spring catalog of bedding and blooming plants, a catalog of wedding flowers, a catalog of funeral designs and bouquets, and special leaflets and price-lists of cut-flowers and their arrangements from time to time. Any of these price-lists may be had on application.

IMPORTANT TO FLOWER BUYERS

There are no mail deliveries (except special-delivery letters) in St. Paul on Sundays or holidays. Mail orders sent to reach us on those days should have a special-delivery stamp attached to insure their being delivered. If there is any doubt about mail reaching us, your order had better be telegraphed or telephoned.

We do not recommend sending flowers by parcel post, and cannot be responsible for them when so shipped. When shipped by express, and the transit time does not exceed 36 hours, we guarantee safe arrival.
